The BioScholars program is designed to give students majoring in the Biological Sciences the opportunity to pursue their interests as part of a smaller community of scholars. It connects students to the resources of a large university, and the program provides an intimate collegiate atmosphere where students work closely with peers and professors in small group settings, research laboratories, special programs and activities.

**STEM OUTREACH**
Get an exclusive opportunity to teach 9th grade students at local charter school Preuss School valuable skills about research papers through current cutting-edge research.

**BIOTECHATHALON**
Plan or participate in a two-day competition, to solve a real-life problem that biotechnology companies and nonprofit organizations face.

**BISP 170 SEMINAR**
Get a behind-the-scenes look into what goes into planning a seminar from picking a current research area, interacting with esteemed professors and working to build a seminar from scratch.
