This major provides a program for studying the bodily and neural functions of complex organisms. Within this major, a student may concentrate on specialized areas of study such as: human biology, neurobiology, ethology, endocrinology, marine biology, and reproduction.

This major is most directly applicable to health-related professions such as medicine, nursing, dentistry, veterinary medicine, pharmacy, physical therapy, and medical technology.

Animal Physiology and Neuroscience majors are also well prepared to enter other professions such as physiological research, physical education, agriculture, and wildlife management.
